

# SWINE FLU

Protect yourself  
against bacteria and germs

## SWINE INFLUENZA

As we are all aware, Governments around the world are urgently discussing methods of containing the spread of the new Swine Flu Virus, after outbreaks being reported in various countries

There is not a great deal we can add to the abundance of information being issued by the Health Protection Agency and the World Health Organisation, except to continue with good hygiene standards and ensure hands are washed on a regular basis, as described below.

### What measures can I take to prevent infection?

General infection control practices, good respiratory and hand hygiene can help to reduce transmission of all viruses, including the human swine influenza. This includes:-

- ◆ Covering your nose and mouth when coughing and sneezing, using a tissue when possible
- ◆ Disposing of dirty tissues promptly and carefully
- ◆ Maintaining good basic hygiene, for example washing hands frequently with soap and water followed by hand disinfection with Handsan, to reduce the spread of the virus from your hands to your face or to other people.
- ◆ It has been reported that the virus will survive on hard surfaces for up to 24 hours and therefore frequent cleaning of hard surfaces (e.g. worktops & door handles) using a product such as Evans Protect, Evans Safezone or Evans Vanoquat at the recommended dilution rate
- ◆ Ensure children follow this advice especially on washing hands.

**PROTECT**  
DISINFECTANT CLEANER  
5 litres - *Infection control* – dilute 1:10  
750ml – *Ready to use*

**SAFEZONE**  
VIRUCIDAL DISINFECTANT CLEANER  
5 litres - *Infection control* – dilute 1:5  
750ml – *Ready to use*

**VANOQUAT**  
QUATERNARY DISINFECTANT  
25 Litres - *Infection control* – dilute 1:25

## Handsan Alcohol hand rub with moisturiser

Quick acting & highly effective alcohol based hand sanitiser. Kills a range of bacteria & viruses. For use in between patient contact in non-surgical medical care establishments. Unperfumed, ideal for use in the food handling & preparation areas.

- Passes EN 1276 with a 30 second contact time
- Formulation contains 70% alcohol and added glycerine for skin protection
- Rapidly evaporates from hands without leaving a residue or odour
- Ideal for use on unsoiled hands where soap & water is not readily available
- Available in 75ml clip-on bottle c/w spray dispenser, 500ml free standing bottle c/w pump dispenser & 1ltr cartridge bottle
- Packed in 12x75ml, 6x500ml & 6x1ltr
- Also available in a 5lt bottle for extra economy
- Wall & bed brackets available for 500ml bottle

# sani | safe

Combining an effective disinfectant solution along with 28gsm cloth makes these wipes the perfect answer for food preparation.

In today's food preparation areas, hygiene guidelines are tough and the risk of cross contamination through neglecting these requirements puts many people at risk. With the surface wipes, cross contamination is eliminated with a single stroke, killing off all potentially lethal bacteria from passing from one product to another.

PACKED:

Sanisafe. 20 x 23cm

|PSS4      200 Wipes per tub

4 Tubs

# telephone | wipes

Combining an effective disinfectant solution along with the ideal cloth weight makes these wipes the perfect solution.

In today's working environments, it is very easy for virus to spread between colleagues simply through sharing equipment. These handy wipes are an ideal size to keep handy and give off a pleasant fragrance that also identifies when the product is actively killing off bacteria. Wet wipes are idea to use around sensitive equipment such as telephone recievers, and can be used as frequently as required.
